

3DBear

The New Standard of Learning

3DBear, a Finnish company, draws on 8 years of proven expertise in professional education, combining rigorous research, pedagogical AI, and immersive technology to deliver hands-on learning solutions for real-world challenges.

In Tanzania, our simulation-based learning materials are already being used in vocational education, developed in close collaboration with local educators, educational institutions, Save the Children, and Hakielimu.

1. HYGIENE KNOWLEDGE
