UNIVERSITY
OF TURKU

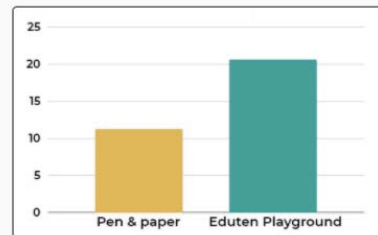

Centre for Learning Analytics

UNESCO and UNICEF awarded #1 Learning Platform. From Finland.

Eduten is a gamified and AI powered digital learning platform developed at University of Turku, Finland based on **17+ years of scientific research** on digital learning and teaching. It **reduces teacher workloads**, **helps children learn faster** and gives **real-time analytics dashboards** for teachers and school management.

Eduten comes with a content library of a full digital mathematics curriculum **for ages 5 to 18**. The exercises have been developed in cooperation with hundreds of Finnish teachers and dozens of scientific studies **prove its impact to learning results** and grades. Eduten can be translated to any language and is already available in many languages, including **English, Spanish and Portuguese**.

45% improvement vs. control group to mathematics fluency

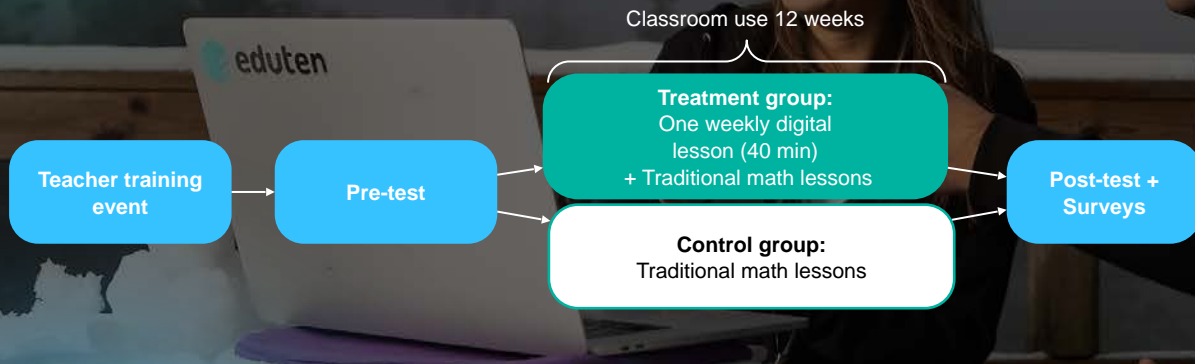

Eduten is the **most popular digital math tool** among Finnish teachers. It is used in more than **70%** of all schools in Finland and around the world. It's benefits have been enjoyed by over **3.2 million students and teachers** in **50+ countries** since 2011.

As a cloud-based web application Eduten easily **scales to any number of schools** without any installations. It's exercise library is **aligned with all curricula**.

Eduten is all about proven impact on learning outcomes.

Raise the standard of your nation's education with Eduten – Finland's leading math learning platform. Eduten has already been implemented nationally in Finland, Mongolia, Lithuania and Bhutan.

The main goal of the National Impact Pilot is to test Eduten's effectiveness in supporting national education priorities, including enhancing student learning outcomes and advancing digital transformation. After the pilot, Eduten delivers an pedagogy expert-made, high-quality academic report about the results of the study. Learn more about the National Impact Pilot at eduten.com/governments
